

MSF has a legacy of taking principled medical humanitarian action and speaking out.

**HOWEVER humanitarian aid has a legacy of Euro-centric worldviews and colonial power structures.**

**THIS SYSTEM** amplifies the “white saviour” narrative, displaces and denies the experience and knowledge of local communities, and breeds structural racism within MSF.

**This must change.**

We are beginning the journey of **DECOLONIZATION** and transformation towards inclusion.

We are building an **ANTI-RACIST** organization that preserves the **DIGNITY** of patients and staff.

**Connect** to conversations, mentoring and e-learning spaces to be part of the change.
